

Turn your Ideal Customer's

DEVELOPERS INTO INTERNAL CHAMPIONS

Host a fintech hackathon that gets your technology built, demoed and championed inside the companies you want to win.

860% PROVEN ROI

See Case Study Inside

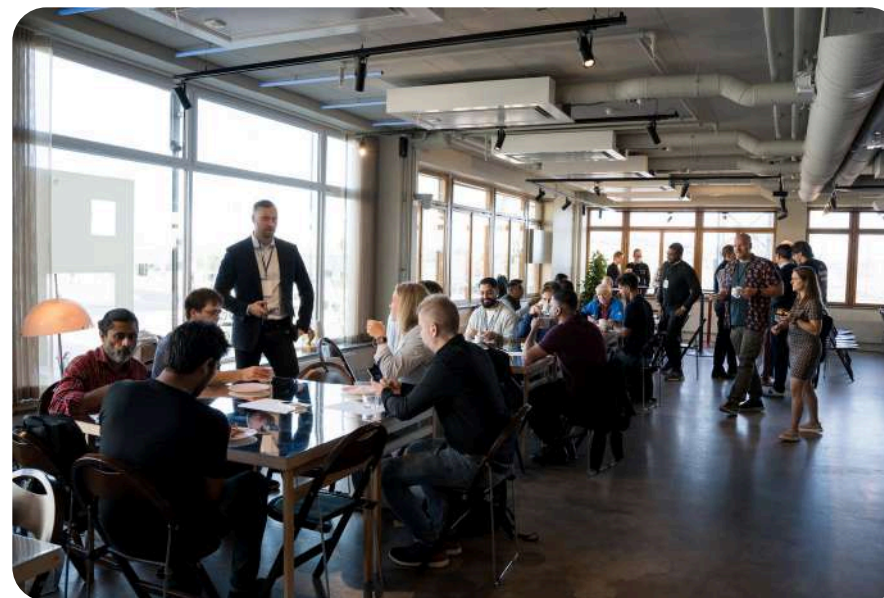

Your best salespeople are the **DEVELOPERS ON THE INSIDE.**

TRADITIONAL GEN DEMAND

You tell your ICP what your technology can do.
Ads, events, outbound and content can create awareness... but they don't necessarily give the people inside your target accounts a reason to champion your technology internally.

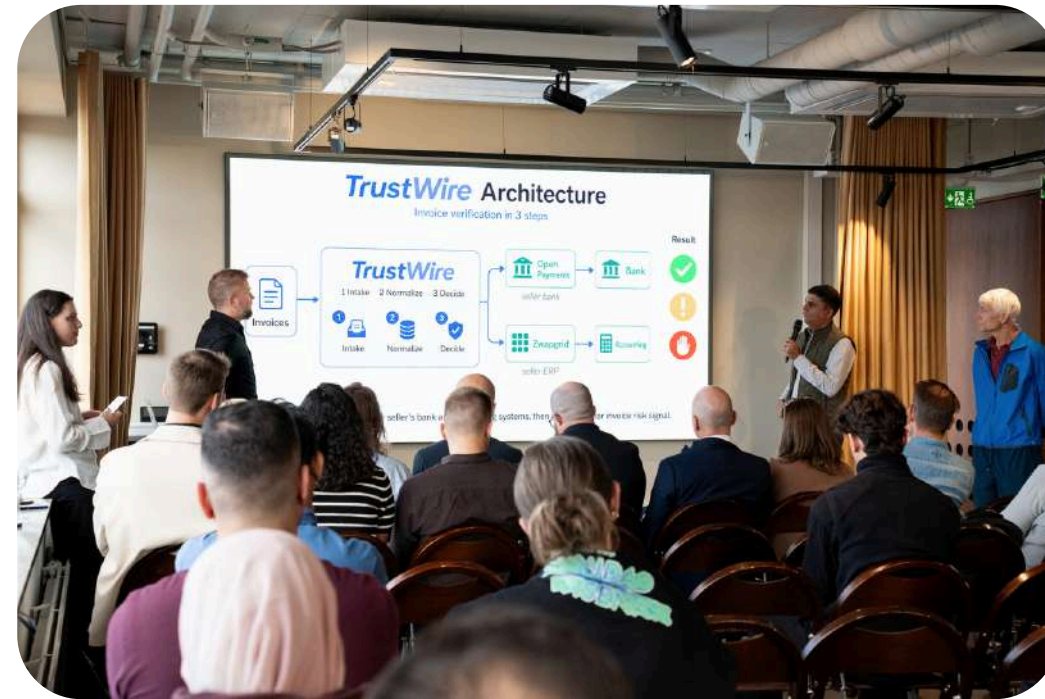

THE OPPROTUNITY

- Let your ICP's developers prove what your technology can do.
- Give them the APIs, infrastructure and freedom to build something relevant to their own world.
- They naturally demo their build- internally to stakeholders- and champion your technology inside your ICP's organization

Instead of telling your ICP what your product can do, **let their developers prove it and show it off**

Turn your ICP into your best SALES CHANNEL.

Hosting a build day gives you multiple channels of value:

860%+

CONSERVATIVE ROI

Based on organic reach, build output and developer feedback. Plus tracked internal demos.

2,640%+

FULL VALUE CASE

Including the higher estimated value of the generated build output and internal demos.

1.5M SEK

POTENTIAL PIPELINE

The report estimates approximately an added 1.5M ARR SEK in potential deal value based on 14 warm leads and a 20% conversion assumption.

90–120K SEK

ORGANIC REACH VALUE

Estimated value of the LinkedIn reach generated organically versus paid advertising.

ROI figures are based on the Embedded Finance Build Day case study and its stated assumptions.

From Developer to CHAMPION.

They Build

Give developers hands-on access to your technology.

They work with your APIs and infrastructure to solve a real problem in a single, focused build sprint.

They Demo

They create something they are proud of.

Now your technology isn't a pitch deck or product demo. It's something they've actually used to build.

They Champion

They take the idea back inside their company.

The developer becomes an internal advocate, showing colleagues what your technology can actually do and where it could be used and we actually track that this happens.

FINANCE
BUILD DAY
2026**

The Jury

Dan Hyrynen
CTO, Froda

Ola Hjort
Head of Technology and Engineering for Digital
Services, Worldline

Christie H. Kristensen
Partnerships Manager for Open Banking, Danske
Bank

Louise Brandt
CEO, Open Payments

Leo Berghald
CEO & Founder, Zwapgrid

Mats Persson
CEO, Zinova

44
ICP Builders

26
Companies Attended

15
Working Prototypes

10-14
Warm Leads

Developers didn't just attend. They built with the technology, validated real problems and created reasons for sales to continue the conversation.

- 100% used both APIs
- 7 teams independently identified supplier-account fraud
- 6 teams built liquidity decisioning
- 0 reported blockers on Tech Partners endpoints

Tracked Internal Demos

Froda

Danske

Bank

ACCOUNT PENETRATION

Reach accounts that aren't in your database yet.
15 target-account companies were reached organically even though they never registered for the event.

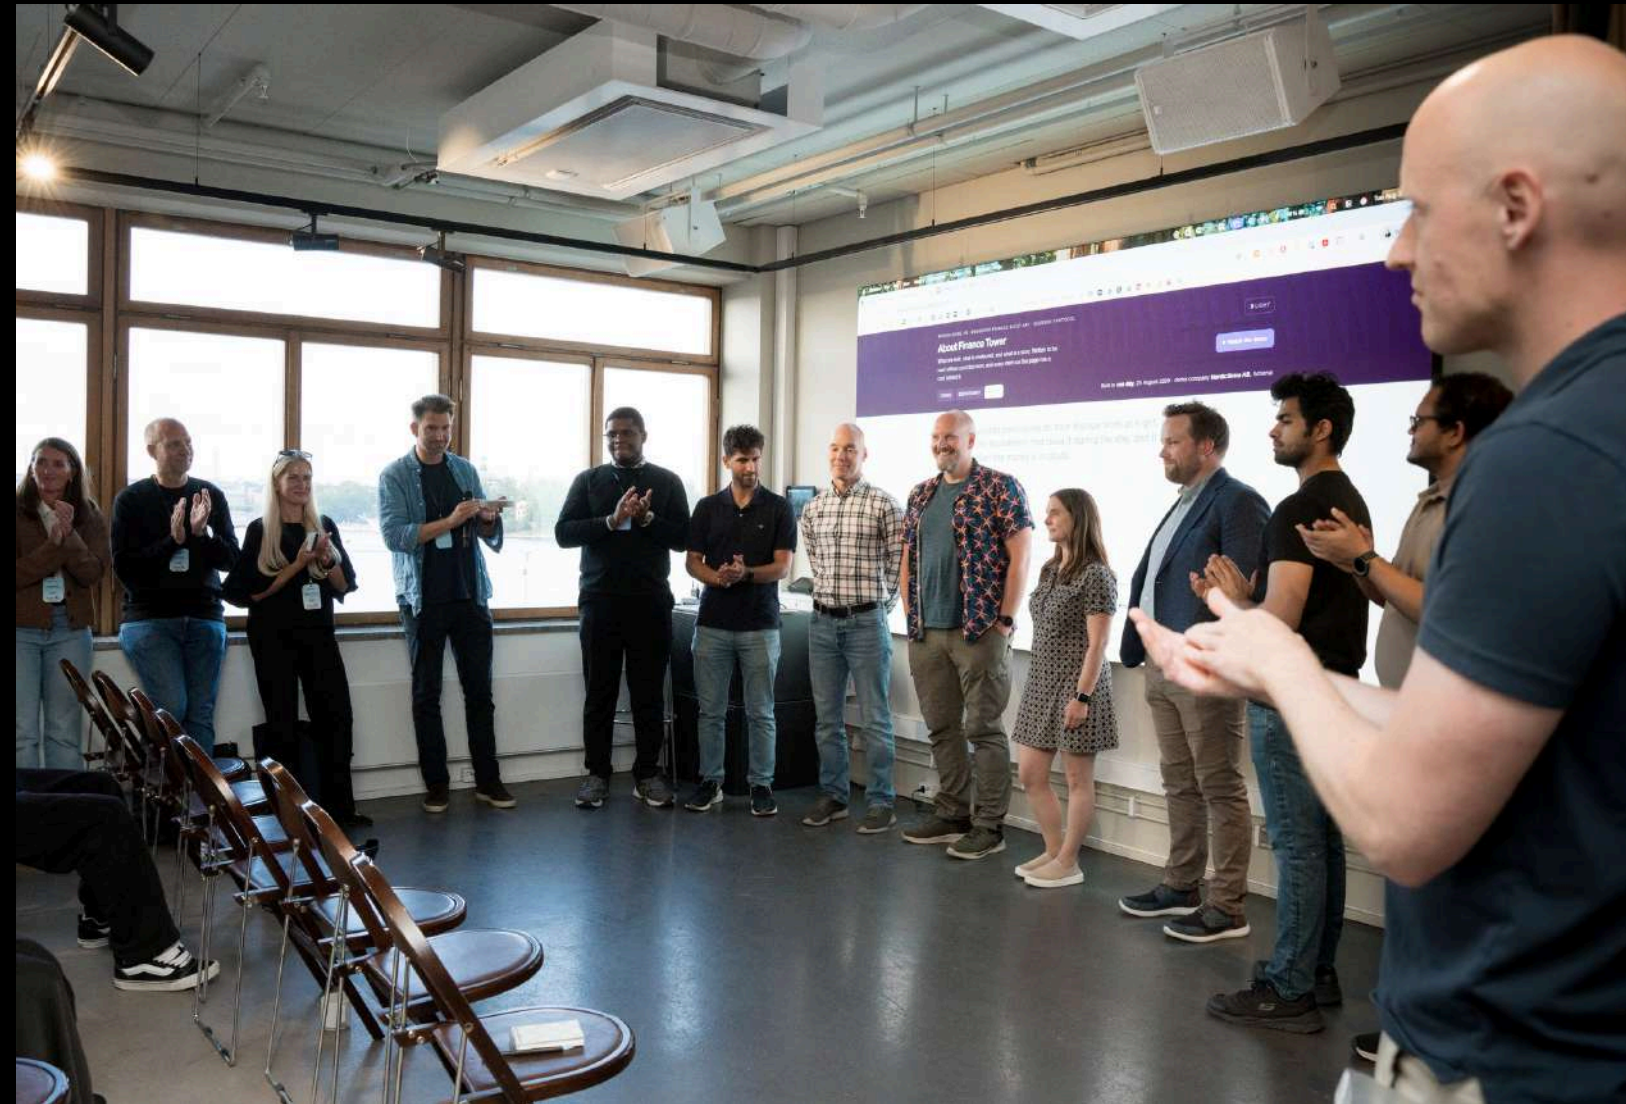

PRODUCT INTELLIGENCE

See what developers actually want to build.
15 teams produced working prototypes, surfacing recurring problems, product gaps and new use cases.

RELATIONSHIPS

Build relationships with the people behind the accounts.
The event brought together 26 companies, while strengthening relationships with existing partners.

GET STARTED

Costs of Hosting a Hackathon

For 200 developers you will need: a venue, food costs and resources to recruit engineers / get your ICP to be there. You can offset these costs by collaborating with joint sponsors. On average an event like this will cost € 10 000 for the venue and food.

Start Up

Required: two internal resources dedicated to this project: one sales and one communications. **Help with the project:** for € 5000 you will get all the guidance you need, strategy for getting co-sponsors, the engineers, the timeline and communication tasks that need to be done. You are responsible for event costs. You will get full strategic support on how to pull off a great hackathon.

Premium

Required: sales. **Hands on Help:** € 17 900 and I am responsible for getting 200 developers and a waitlist. I am responsible for producing the communication materials. You are responsible for the venue / food costs and the Jury. If you want co-sponsors to off set the costs you're free to involve them.
